OneStack

OneStack Proposal - Switch

▼ OneStack

Onestack objective is to make every Bharat Bank a Neo bank, OneStack aspires to be the TSP (Technical Service Provider) by providing Core Banking Solution (OneCBS), Mobile Banking Application & Payment Services.

Onestack will digitize the banking sector with new age technology, which will enable the banks to engage & retain their customers & grow their CASA (Current Accounts & Savings Account). The customers of the banks will now be able to access to the full range of needs-based financial services – savings, credit, insurance, payments – and also solve the financial inclusion objective of Bharat.

▼ Product & Services

▼ Mobile Banking Solution

OneStack has pioneered India's super app designed exclusively for bank customers, offering the ability to Save, Borrow, Spend, and Grow their finances seamlessly, all without ever leaving their trusted banks.

We empower banks with our cutting-edge white-label mobile application, thoughtfully integrated with their existing Core Banking System (CBS). This integration serves as a powerful catalyst for the bank's digital transformation journey, equipping them to compete effectively with larger banks and emerging FinTech players.

▼ Switch Connectivity

OneStack is **Certified Technology Service Provider (TSP)** of **NPCI** to financial institutions for implementing, managing, and maintaining switching infrastructure.

▼ UPI Switch

- OneStack supports banks and financial institutions in implementing, managing, and maintaining their UPI switching infrastructure. OneStack is a registered TSP with NPCI to provide UPI switching services to the banks providing direct connectivity with NPCI UPI platform.
- OneStack supports NPCI’s model for UPI enabled banks to become PSP (Payment Service Provider) for issuing and acquiring UPI transactions
- OneStack provides bank branded PSP mobile application with features like UPI handle, QR Code, and Soundbox for all the Banks Customers.

Features						
UPI Account Creation	QR Scan & Pay	Mini Statement	Account Management	Dynamic QR	Reconciliation	Transaction pattern analysis
Bank Account Linking	Autopay Mandates	Fraud Detection	Merchant Payments	Merchant Onboarding	Merchant App	Transaction Search
VPA Management	UPI PIN Management	Dispute Resolution	UPI Payments	SoundBox	Risk Monitoring	System Health
Pay Transactions	Transaction Limits	Bill Payments	Transaction History	Merchant Settlement	Transaction Limits	Settlement Reports
Collect Requests	Balance Inquiry	AutoPay	Static QR	Transaction Routing	Real-time alerts	Transaction status tracking

Features						
TD / BD Tracking	KYC Verification	Bank's UPI Handle	CBS Integration	Voice Notification	16+ Languages	SIM + Device Binding

▼ Issuer Switch

- Banks customers can accept & Send UPI payments From & To :
  - Own Bank Customers / Merchants
  - Other Bank Customers / Merchants (SBI, HDFC, ICICI, Yes Bank, etc)
  - TPAP - Third Party Mobile Application (GPay, PhonePe, etc.)
- Customers can generate their own UPI ID / QR on TPAPs

▼ PSP & Issuer

- Bank gets a Bank Branded UPI PSP App
- Customers can generate their own UPI ID / UPI QR on the Bank's own mobile app
- Bank customers / merchants can receive payments using UPI from the app
- Bank customers / merchants can make payments real time using UPI from the app
- Bank customers / merchants can generate dynamic QR codes and dynamic UPI IDs
- Customers can set up UPI Auto Pay

▼ Additional Features

- TD / BD Dashboard
- Integrated SoundBox
- Merchant Onboarding Module
- Activation / Deactivation of UPI ID's / QR Codes
- Automated KYC Checks
- Document Storage
- Customer / Merchant Profile Management with MCC Mapping
- Transaction Management Rule Engine (limits on Transaction Value, Transaction count, Transaction volume)
- Real-time dashboard for Business
- Bank Level User Management
- Automated reconciliation
- Self-service control console
- Executive analytics

- OneStack will initiate various testing giving OneStack Product Certificate across all the above levels
- The bank must go live within 50 days after receiving certification from NPCI.
  - Multiple Rounds of UPI Product Testing
    - Sandbox Testing

- Comfort Testing
  - UAT - User Acceptance Testing

Note

Mandatory requirement for Banks

- Mobile Banking Service approval.
- Direct RTGS Membership with RBI for PSP.
- IMPS Connectivity - directly or through Sponsor bank.

▼ IMPS Switch

IMPS is a robust, real-time, instant payment, electronic funds transfer service that is available 24×7, across the year (including holidays), to facilitate inter-bank (account- to-account, account-to-wallet* and wallet- to-account) fund transfers. It can be accessed on multiple electronically enabled channels such as mobile, internet, ATM, SMS.
Banks and payment banks that have RBI approved mobile banking licenses are eligible to avail of and offer IMPS.

- OneStack will help banks and financial institutions in implementing, managing, and maintaining their IMPS switching infrastructure. OneStack is a registered TSP with NPCI to provide IMPS switching services to the banks providing direct connectivity with NPCI IMPS platform.
- Supports different kinds of transactions like P2A, P2P, P2U, and P2M
- Auto Reconciliation Module
- Dashboard for log management and transaction monitoring

▼ BANL

OneStack's new **Beneficiary Account Name Lookup** feature allows users to verify the name of the recipient before making a fund transfer. By entering the account number and IFSC code, users can confirm the beneficiary’s name, helping reduce errors and fraud. This feature supports NEFT and RTGS transactions and is available via mobile, internet banking, and bank branches.

▼ BBPS Switch

OneStack as a **Certified Technology Service Provider (TSP)** of **Bharat Connect (BBPS)** will onboard Banks & Financial Institutions on BBPS as an operating Unit. BBPOUs may be banks as well as non-banks.

Becoming a BBPS OU opens up significant opportunities for revenue generation, market expansion, technological advancement, and enhanced customer relationships in the digital payments landscape. Being part of the BBPS network means access to a large customer base who prefer the convenience of digital bill payments. This can lead to increased customer acquisition and retention.

There are three categories in which a BBPOU can function either as a Biller Operating Unit or as a Customer Operating Unit or Both:

Biller Operating Unit (BOU)

Biller Operating Unit (BOU) is an entity that onboards biller(s), either directly or through biller aggregator(s), onto the BBPS platform for collection of its bills or other receivables, as the case may be.

Customer Operating Unit (COU)

Customer Operating Unit (COU) is an entity that provides its customers with an interface (physical/digital) to pay bills, either directly or through Agent Institution(s) or its Agents.

▼ E-KYC Switch

OneStack is a registered NPCI TSP for providing e-KYC services from NPCI.

e-KYC is specifically designed to streamline and enhance the customer identity verification process while ensuring compliance with regulatory standards.

```
Bank Systems  →  OneStack (TSP Platform)  →  NPCI eKYC Switch  →  UIDAI Authentication
↑                                ↓                                          ↓
 ←──────────────── Verified eKYC Data Response ────────────────
```

▼ Payment Services

We are offering an integrated payments solution to the banks to engage & retain their customer:

- Payment Gateway (Credit Cards, Debit Cards, Prepaid Cards, etc.)
- BBPS (Bharat Bill Payments Solution)
- UPI (Unified payments interface)
- BharatQR
- AePS (Aadhar enabled payment system)
- IMPS (Immediate payment service)

▼ Soundbox

Product Highlights

- Soundbox
- Supports all Bank Payment Modes
